

# T5-171 Threshold Strip

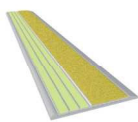

## T5-171 Threshold Strip

The T5-171 is designed to create a highly visible step edge to reduce falls and enhance speed in all situations whether light, dark or dimly lit.

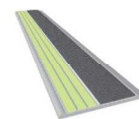

The T5-171 can be easily glued into place. It can also be mechanically fixed by drilling through the non-slip area as suited to the location

The photoluminescent strip is visible for many hours after the lights go out, having been charged from sunlight or artificial light.

The T5-171 also has a hard wearing slip resistant silicon carbide strip.

T5-151  
Yellow Slip Resistant silicon carbide  
+ Photoluminscent Strip

T5-161  
Grey Slip Resistant silicon carbide  
+ Photoluminscent Strip
